Safety and fuel efficiency play an important role in your fleet’s performance. STEMCO’s TrailerTail® with AutoDeploy™ reduces the low-pressure vacuum at the back of your trailer, streamlining airflow and reducing drag. It deploys automatically at 35 miles per hour, resulting in an immediate 5.5% increase in fuel efficiency. TrailerTail® technology also improves stability and visibility for increased safety and peace of mind.

Don’t let trailer drag slow your profitability.
