

# SUPERIOR SEALING IN SEVERE APPLICATIONS

Engineered for exceptional performance, durability and contaminant exclusion in severe service applications, the STEMCO® Grit Guard® hub seal features a two-piece design that reduces maintenance and unnecessary wear on expensive spindles.

## **SPINDLE-MOUNTED DEFLECTOR RING**

Provides new surface for sealing lip; compensates for worn or damaged spindles.

## **METAL CASE SEAL**

Exceptional durability; provides metal-to-metal press fit between seal and hub.

## **BLUE BORE SEALANT**

Applied to case seal; prevents minor seepage between the seal and hub.

## **ELASTOMERIC LEATHER SEALING LIP**

Rotates on deflector ring for improved heat dissipation; remains flexible and durable in the most grueling environments.

## **DUST SHIELD**

Built into deflector ring; creates an additional level of dirt and contaminant exclusion.

## **SEVERE-SERVICE PERFORMANCE**

Designed for rugged, severe-duty applications that exceed the capabilities of other seals.

## **HIGH PERFORMANCE IN EXTREME TEMPERATURES**

Performs even in the extreme cold; handles temperatures as low as -60°F compared to rubber seals (-40°F).
