

# LONGER LIFE FOR THE LONGEST HAUL

The Guardian® HP incorporates the best features for preventing the leading causes of seal-life degradation—contamination ingress and heat generation.

## **TECHNOLOGICALLY ADVANCED SEAL**

Guardian HP has been developed for extra protection and greater sealing. The rubber outer diameter allows for faster hub cleaning with less corrosion damage to the hub.

## **SINGLE-STEP, ERROR-PROOF INSTALLATION**

Installation directly on the axle, rather than the hub bore, ensures positive alignment every time. No tool impact on the seal means no damage or installation-related failures. Plus, Guardian HP is easy to remove and service, so there's no opportunity for bearing damage during seal removal.

## **TRAILER AND AXLE OEM STANDARD SEAL**

With over 25 years of proven success, Guardian HP is the OEM seal of choice in the heavy-duty trailer industry. The enhanced seal features offer improved cost-per-mile performance in addition to simple, one-step axle installation.

## **EXCLUDES CONTAMINANTS AND DISSIPATES HEAT**

The Guardian HP seal has a direct metal heat sink into the axle tube. The four-zone labyrinth and deflector ring provide unmatched contaminant exclusion.

**Guardian HP Application Reference Guide**

APPLICATION	GUARDIAN HP	INNER BEARING	UNIVERSAL AXLE TOOL HEADS
<b>19,000# Trailer Axle:</b> Standard Forge, Dana, Meritor, Eaton	307-0713	663	555-5100

Sealing lip, O.D. beads, thrust pad, and flexible contaminant exclusion lips are all molded as a single unit from high-temperature rubber for fewer leak paths and better heat resistance.

Flexible containment exclusion lips  
O.D. beads allow for easier hub docking

High-performance sealing lip  
Semi-unitized design
