SUPER-CUSHION® AIR SPRINGS

**FOR TRUCK, TRAILER AND BUS SUSPENSIONS
AND FOR CAB AND SEAT SPRINGS**

GOODYEAR
AIR SPRINGS

Making the Roadways Safer®

STEMCO®
A Higher Standard of Performance.™
an EnPro Industries company

STEMCO AIR SUSPENSION FEATURES & BENEFITS

TOP BEAD PLATE THICKNESS

- Reduced leakage at crimp — Longer Life

OZONE RESISTANCE — 2.4 TIMES PROTECTIVE MATERIALS

- Reduced Cracking — Longer Life

EPOXY POWDER COATED PISTONS (STEEL)

- Reduced Bellow Wear — Longer Life

EXTEND-AIR: DOUBLE WRAPPED FABRIC

- Reduced DOT Downtime (Up to 20 Times Life)

TYVEK TAG WITH PART NUMBER

- Easy Identification

GOODYEAR & STEMCO BRANDS

- Customer Confidence

4 YEAR WARRANTY

- Longest in the Industry

STEMCO SALES TEAM — LARGEST IN NORTH AMERICA

- Sales Support & Training

SUPER-CUSHION® AIR SPRINGS FOR TRUCKS, TRAILERS, AND BUSES

Super-Cushion air springs for trucks, trailers buses, and cab & seat springs protect cargo, provide constant-level hauling, and deliver long, trouble-free service. Super-Cushion air springs give your trucks, trailers and buses a new high in productivity and long life. They offer a quiet, cushioned ride. Truck, trailer and bus bodies last longer than with steel springs because there is less vibration. The driver rides in greater comfort, becomes less fatigued and stays more alert. Plus cargo has better protection from shock and vibration. Whenever you want to add an axle, Super-Cushion air springs fit right in. Super-Cushion air springs, when used with leveling valves, also maintain consistent trim regardless of the load. That means clearance heights remain constant, and that trailer floors are flush with loading dock floors for ease of loading and unloading. For driver comfort, load cushioning, and long life for your trucks, trailers, bus, and cab and seat springs specify Goodyear Engineered Products Super-Cushion air springs.

COMPONENTS OF SUPER-CUSHION® AIR SPRINGS

ROLLING LOBE AIR SPRING (1R DESIGN)

DOUBLE CONVOLUTION AIR SPRING (2B DESIGN)

UNIQUE PRODUCT IDENTIFICATION SYSTEM

The Super-Cushion air spring assembly part number consists of the Product Description and the Assembly Number. Elements of this system are shown in the following example for ordering a 2B12-300 Assembly:

2 B 12 - 300

HOW TO CHOOSE THE CORRECT REPLACEMENT AIR SPRING

Many air springs appear to be similar in design and size at first glance. However, differences in the manufacturing techniques used for similar looking air springs may create substantial differences in operating dimensions. Specifically, the inflated (or operating) diameters of seemingly identical air springs will vary depending on the angle of the reinforcing fabric used in the flexible member.

For example, air spring models 1R12-092 and 1R13-039 appear very similar when first examined. However, the 1R12-092 model will inflate (operate) on vehicle at approximately 12" diameter, while the 1R13-039 model will operate at 13" diameter. In a substitution of the 1R13-039 air spring for the 1R12-092 in a truck trailer suspension, the larger air spring inflated diameter would most likely rub on another suspension component (such as a tire, shock absorber, or bracket) and cause failure within a few miles.

Air springs with interference type failures will not be considered for warranty claims. Be sure to select the correct replacement!

To select the proper Goodyear Engineered Products Super-Cushion® replacement air spring, use the procedure on the next page.

CAUTION: Numbers molded on the rubber bag (flexible member) are NOT the assembly part numbers. Bags with the same numbers are used with different combinations of top and bottom metals. They may or may not have an internal rubber bumper.

AIR SPRING IDENTIFICATION

1. Start with the original equipment or aftermarket part number. It is usually located on a label affixed to the top plate of the air spring. If it is a Goodyear Engineered Products part number, simply double check the product photo in the main body of the catalog. If you have an O.E. number or a Firestone number look in the cross-reference section.
2. If the O.E. part number or aftermarket part number is unknown you should begin your search with the bellows number. The number is molded into the rubber part of the air spring. Once identified you can narrow down the choices in the Flexible Members Index section.
3. Measure the width of the top plate and make a note of the bolt pattern or taps.
4. Measure the width of the piston or bottom bead plate and make a note how the bolt pattern is oriented compared to the bolts on the top plate (Inline or Rotated). The view of this orientation should appear as if you are looking directly through a clear drinking glass from the top to bottom. This is how the catalog illustrations are drawn.
5. Measure the height of the air spring with no air pressure from the top plate to the bottom of the piston. This is the extended height.
6. Compress the bag as far as possible with no air pressure and measure the height. This is the compressed height or minimum height.
7. Measure the distance from center to center of each bolt on the top and bottom of the air spring.

2B DESIGN

3B DESIGN

NOTES: If the air spring you are replacing has studs (retainers) attached to the top or bottom plate, and the Goodyear Engineered Products Super-Cushion® air spring is identical except that it has recessed, blind taps, use the optional shoulder studs 578-92-9-056. (Pictured to the right.) Screw these into the plate using Lockite #271, or equivalent, thread lock to insure that the studs do not loosen in service.

If you wish to use cap screws or your own bolts to attach air springs with recessed blind nuts to the suspension, the screw must have 3/8-16 threads and must extend no more than 0.562" into the blind taps. Deeper penetration will cause the new air spring to leak and it cannot be repaired satisfactorily.

Air springs with damaged blind taps cannot be considered for warranty claims.

**SHOULDER STUD
578-92-9-056**

AIR SPRING INSTALLATION

Before you start installing air springs, make sure you have all the necessary tools and equipment to perform the repair safely. Familiarize yourself with the suspension on which you are performing the repair by reviewing the manufacturer’s service guide. If you are in doubt about something, ask for assistance from a qualified suspension specialist, the suspension manufacturer or the air spring manufacturer; it can save you a lot of time and aggravation later in the job.

Here are important tips to remember when installing a new unit:

- When disconnecting the leveling valve linkage, check for bent or broken link-age; if you find any, replace the damaged parts.
- Check shock absorbers for possible replacement. There are usually two warning signs indicating a worn shock. If it can be easily compressed or extended, it is time for a new unit. Also, if the vehicle has just been brought in for service, the shock should be warm to the touch. If not, it needs to be replaced. Remember, proper shock maintenance is one of the keys to long air spring life.
- Once the air lines are disconnected, check the line for cracks or damage. Also check for loose fittings, and replace any worn components.
- Some times the cause of air spring failure is visible and/or readily apparent; other times it is not. When it is not, inspect the air spring after you have removed it to determine the cause of failure and then correct the root cause of the problem.
- With the air spring removed, other parts of the air suspension become more accessible. Check for wear or damage of the frame hangers, trailing arm bushings, torque rods, the trailing arms and the air spring mounts. Again, replace components where necessary.
- Also check the area around the air spring mounting to ensure there are not any obstacles or sharp edges that can damage the new air spring.
- Before installing the new unit, clean the air spring mounting plates to ensure proper attachment to the suspension.
- Always use new attaching bolts for the installation. Old bolts should never be reused since they may fail.
- Check the leveling arm for proper operation. Under load, the leveling arm should move from the neutral position up to the intake position. This lets air into the springs, which brings the arm back to the neutral position. When the load is removed, the leveling arm should move down to the exhaust position. That opens the exhaust valve, allowing air to escape until the arm returns to the neutral position.

AIR SPRING INSTALLATION

NOTES

Add Shoulder Stud #578-92-9-056 where required.

SAFETY & LONGEVITY RULES

1. Use Goodyear Engineered Products Flexible Members on Goodyear Engineered Product Pistons Only.
2. Replace ALL air springs on each axle instead of just one.

Following Rule 1 will prevent component failure due to interference with other suspension parts or other truck/trailer components.

Following Rule 2 will give equal riding heights & bounce response to insure a stable and safer ride.

Any old air spring assemblies which are still serviceable could be carried.

AIR SPRING TORQUE REQUIREMENTS

The following values are considered to be the maximum allowable torque for the designated mounting hardware.

MAXIMUM TORQUE (FT. LBS.)

3/8" - UNC BLIND TAPS	25
1/2" - UNC BOLTOR STUD	25
3/4" - UNC STUD	55
3/4" - UNF COMBO STUD	50

AIR FITTINGS

1/4" NPTF	20
1/2" NPTF	20
3/4" NPTF	20

Air springs failing due to over torqueing will NOT be considered for warranty claims.

AIR SUSPENSION MAINTENANCE VEHICLE CHECK-LIST

- Check air lines and fittings for leaks: rubbing on air spring.
- Check proper clearance around air spring when inflated. Generally, a minimum of 1-1/2" will allow for the increased diameter which occurs in heavy jounce.
- Periodically, check suspension for proper ride height. This dimension should be maintained +/- 1/4" to protect the springs and shocks from over-extension or frequent bottoming out of the suspension.
- When doing routine vehicle maintenance, block up the suspension and check for irregular wear or material build-up on the flexmember. Clean, if necessary, using a non-petroleum based cleaning solution.
- Check rolling lobe piston for material build-up. Hardened debris on the piston will shorten spring life and should be removed as part of your regular maintenance.
- Check shock absorbers for any signs of leaking hydraulic fluid, broken end connections, worn bushings or cylinders, and over extension.
- Periodically, check nuts and bolts for proper torque. See manufacturer's manual for specific recommendations.
- Check height control valve to see that it is functioning properly. Clean or replace, if necessary. A properly maintained valve will save hundreds of dollars in unneeded maintenance expense.

Routine inspection of all of the above, according to a predetermined mileage maintenance schedule will extend the life of your vehicle and reduce your overall maintenance expense.

SELECTED NON-WARRANTABLE CONDITIONS

OVER-EXTENSION

- Eventual tearing away of the bellows from the top plate or the bottom piston.
- The top plate may appear convex.
- Commonly seen on lift axle applications, particularly on trucks and tractors used in severe on/off road service such as construction, logging, or quarrying.
- Results from operation of the air spring beyond its rated maximum extended height or long-term operation at or near its maximum extended height.

Possible causes:

- Improper restraint of the downward travel of the axle that allows the air spring to operate beyond its rated maximum extended height.
- The ride position is too high due to improper adjustment or improper functioning of the leveling valve.
 - Can result in long-term operation of the air spring at or near its rated maximum extended height.
- Shock absorbers are not functioning properly, are missing or are improperly sized.
- Incorrect air spring for application (too short).

NORMAL CYCLE FATIGUE

- Fatigue cracks will appear on the outer surface of the rubber as a normal part of the aging process.
- Minor cracks are not ordinarily a cause for removal.
- The air spring will still function properly provided there is no air leakage.

OVER-EXTENSION

NORMAL FATIGUE

SELECTED NON-WARRANTABLE CONDITIONS

RUBBER DAMAGE FROM CHEMICALS

- Grease and oil are common examples that can cause this condition after prolonged contact with the rubber flexible member.

Possible causes:

- Excessive oil in the air supply.
- Excessive greasing of universal joints.
- Excessive greasing of the fifth wheel.
- Leaking seals in suspension components.
- Use of petroleum based cleaners on the air spring (use only soap and water for cleaning).

DAMAGE FROM CHEMICALS

CORROSION AND IMPACTS

- Deterioration of the top plate or piston.

Possible causes:

- Chemical exposure.
- Road debris being flung into the piston causing a crack.
- Pitting from salt.
- Excessive oil or water in the air supply.
- Build-up of debris on the piston, top plate, or girdle hoops (keep clean with soap and water).

CORROSION AND IMPACTS

SELECTED NON-WARRANTABLE CONDITIONS

EXTERNAL ABRASION

- A hole rubbed into the side of the bellows.

Possible causes:

- Bellows contact with components on the vehicle (such as air lines).
- Road dirt and debris.
- Worn or failed parts in the suspension.
 - Worn bushing
 - Broken shock
 - Misalignment
- Leak or pinch in air line causing spring to be under-inflated.

NOTES

This image shows a full page of blank, lined paper. It features approximately 20 evenly spaced horizontal grey lines across the entire width of the page, providing a guide for handwriting or typing. The background is a clean, solid white color.

NOTES

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

NOTES

STEMCO LP

STANDARD TERMS AND CONDITIONS OF SALE

Definitions:

- a. “Buyer” means STEMCO and “Seller” means the legal entity contracting with the Buyer.
- b. “Order” and “Purchase Order” are used synonymously.
- c. “Delivery Date” means the required date of delivery for Goods on the Purchase Order or Blanket Order Release; or the acceptance in total of the Services provided by the Seller.

2. Acceptance, Modification, and Entire Agreement: Placement of this order constitutes Buyer’s offer to Seller upon terms and conditions stated herein and on the face of the purchase order and does not constitute an acceptance by the Buyer of any offer to sell. This order becomes a binding contract, subject to the terms and conditions thereof, when accepted by acknowledgment or commencement of performance and is binding on the heirs, successors, assigns, and representatives of the Seller. Placement of this order is expressly conditioned upon Seller’s acceptance of all the terms and conditions of purchase contained on or attached to this order. Any acknowledgment form or other form of Seller containing terms and conditions of sale submitted to Buyer from Seller shall not have the effect of modifying the terms and conditions hereof. Any such additional or different terms and conditions are hereby objected to and rejected by the Buyer. Buyer may consider Seller’s request for changes only if such request is made in writing and directed to specific clauses in this order within ten (10) days of issuance of this order. By acceptance of the order, Seller agrees to comply with the terms and conditions contained herein and to provide all Goods and/or Services as described within the purchase order. These terms and conditions constitute the entire agreement between the parties and supersede any previous oral or written representations, including but not limited to provisions in Seller’s quotations, proposals, terms and conditions, acknowledgments, invoices or other documents. No change or modification to Buyers terms and conditions shall be binding upon Buyer unless specifically accepted in writing.

3. Delivery: Time is of the essence in regard to fulfilling this order. Seller shall deliver the Goods and/or Services ordered by Buyer no later than the Delivery Date. Seller shall immediately notify Buyer in the event that Seller’s performance is delayed or likely to be delayed, in whole or in part, and Seller shall provide Buyer with all information regarding any reasons for such delay. Such notice shall not constitute a waiver by Buyer of any Seller’s obligations under the purchase order. Buyer has the right to cancel all or a portion of this order which has not been delivered in accordance with the Delivery Date. Seller will limit and phase expenditures, incurrence of costs, and purchases and subcontract commitments for raw materials and components in such fashion to ensure continuity in production and permit performance and completion of each production increment in sequence without creating any unreasonable accumulations of raw materials or work in process of components for any production increments. If the specified mode of transportation for the Goods would not permit the Seller to meet the Delivery Date, Seller shall ship Goods by air freight or other expedient means acceptable to the Buyer and Seller shall pay the costs of such freight for such expedited shipment, over the cost of the specified mode of transportation. Seller shall be liable for any production line stoppages or related expenditures incurred by Buyer or charged to Buyer by its customers, which are caused by the failure of Seller to deliver its Goods and/or Services in a timely manner. Default in delivery caused by Acts of God or other extraordinary events or occurrences beyond Seller’s control and without its fault or negligence shall not make Seller liable therefore, provided Seller immediately notifies Buyer of said event and the estimated delay in delivery. If the Goods and/or Services ordered by Buyer are in excess of the volume stated on the order, and/or its releases, or are delivered more than five (5) days prior to the Delivery Date, Buyer may reject such delivery of Goods and/or Services and may return such rejected Goods at Seller’s own risk and expense, including, without limitation, transportation and insurance charges. Buyer may delay delivery or acceptance occasioned by reason of force majeure or other causes beyond its control. Seller shall hold such Goods at the direction of the Buyer and shall deliver them when the cause affecting delay has been removed. Causes beyond Buyer’s control include, without limitation, government action or failure of the government to act where such action is required, strike or other labor issues, fire, destruction or impairment of facilities, or Acts of God.

4. Default of Seller: If Seller shall (a) fail to deliver Goods and/or Services within the time scheduled or in compliance to the Delivery Date or (b) fail to perform any other provision of this order or (c) become insolvent, or (d) file or have filed against it a petition under any state or federal bankruptcy or insolvency law, then, and in any such event, without prejudice to Buyer’s other rights or remedies Buyer shall have the right at its option to terminate this order, in whole or in part. Upon any such termination Buyer may exercise any and all rights accruing to it, both at law including those set forth in the Uniform Commercial Code or in equity and may also (1) require Seller to deliver forthwith any or all Goods, or parts thereof, which have been produced, or are in process of production pursuant to this order, in which event Buyer shall pay Seller the order price for the acceptable completed items so delivered and shall reimburse Seller for its costs actually incurred with respect to the partially completed Goods so delivered, provided that such costs in no event shall exceed the order price equitably allocated therefore and (2) procure, for such items and in such manner as it may deem appropriate, Goods and/or Services similar to those terminated, and to recover from Seller the excess cost incurred by Buyer in procuring such similar Goods and/or Services. Seller’s obligations under the Warranty, Patent and Confidentiality provisions of this order shall survive such termination.

5. Price: This is a firm price order. Seller represents and warrants to Buyer that the price for Goods and/or Services provided under the purchase order are the lowest prices, whether or not published, for which the Seller has sold or is selling such Goods and/or Services, taking into account any

differences in quantities and/or delivery schedule. Buyer shall be entitled to receive from Seller a price reduction if Seller offers substantially similar Goods or Services to others at a lower price (taking into account differences in quantities and delivery schedule) at any time during the period beginning on the date of the order and ending ninety (90) days after the final payment due date for such Goods or Services. Buyer may take volume discounts retroactively.

All payments due under the purchase order to Seller shall be paid in United States dollars as agreed by Buyer and Seller, from the date of invoice from the Seller. Partial payments may be made at Buyer’s option. Buyer may set-off any amount owed by Buyer to Seller against any amount owed Buyer from Seller. Seller’s acceptance of payment constitutes an unconditional waiver and release of any statutory lien, mechanic’s lien, stop notice, bond right, and claim for payment. Seller warrants, represents and covenants that when final payment is accepted from Buyer, title to all work, materials, and/or equipment shall pass to Buyer free and clear of all liens, claims, security interests or any other encumbrances; and all applicable taxes have been fully paid; and all laborers, mechanics, and subcontractors have been paid or will be paid in full from the final payment. Seller shall pay, without charge to Buyer, any federal, state or local tax or other government charge or assessment relating to the production, sale or shipment of any Goods or provision of Services under the purchase order unless otherwise expressly agreed to in writing by the Buyer. Seller shall make spare parts for Goods purchased pursuant to the order available to the Buyer at Seller’s current price, less all applicable discounts. All costs associated with custom product tooling shall be paid by Seller, unless otherwise expressly agreed to in writing by Buyer. Seller shall bear responsibility for all errors contained in any invoice, acceptance, acknowledgment or confirmation it provides to the Buyer.

6. Changes: Buyer may make changes in the drawings and specifications on any item at any time. If such changes result in delay or additional expense to Seller, an equitable adjustment of price and delivery schedule will be made.

7. Specifications: If drawings, blueprints, or specifications are furnished by the Buyer, the purchase order shall be based upon such drawings, blueprints, or such specifications, and approval of samples by Buyer shall not relieve the Seller from strict and full compliance with such blueprints or specifications. Goods and/or Services not conforming to such blueprints or specifications may be rejected.

8. Inspection / Acceptance: Seller agrees to permit Buyer’s inspectors to have access to Seller’s plant at all reasonable times for the purpose of inspecting the items as set forth in this order and work in process for production of such items. All items are subject to final inspection and approval at Buyer’s facilities or other place designated by Buyer. Such inspection shall be made within a reasonable time after delivery irrespective of the date of payment. The date of payment and the payment for any item purchased hereunder shall not constitute approval or acceptance of such material by Buyer and Buyer’s right of inspection shall survive payment. Any inspection records relating to the Goods and/or Services on the order shall be available to Buyer for a minimum of one (1) year after delivery to Buyer. No inspection (including source inspection) test, approval (including design approval) or acceptance of Materials shall relieve the Vendor from its obligations hereunder or be deemed acceptance of the Materials. Buyer may (1) assess Seller a fee associated with the delivery of defective Goods (2) assess the Seller for all incurred costs and may (3) return rejected items at Seller’s expense and Seller shall bear all costs of return and risk of loss as to rejected items. Seller shall, at Buyer’s election, replace any rejected items returned to Seller hereunder, refund the full purchase price thereof and bear the costs associated with any air freight or expedited delivery to the Buyer of conforming product to remedy any defects of nonconformity to specifications, drawings, or provided samples.

9. Packaging and Shipping: All items shall be prepared and packed for shipment in a manner that will prevent damage in transit. Buyer is not liable for extra charges for packing, cartage or any other expense related thereto unless stated in this order. Seller shall provide Buyer’s part number, order number, line number and release number on all invoices, packing slips, container labels and any other shipping documentation.

10. Warranty: Seller warrants that all goods and/or services provided by it (i) shall be of good quality and workmanship and free of defects, latent or patent; (ii) shall conform to all specifications, drawings or descriptions which are supplied by Buyer; (iii) shall be merchantable and suitable and sufficient for their intended purpose; and (iv) shall be free from any claim of any third party., including without limitation any claims of infringement. Seller may not negate, exclude, limit or modify any warranty otherwise available to Buyer. Any attempt by Seller to do so is ineffective and shall not in any way bind Buyer. Buyer’s inspection or acceptance of any goods or services, or Buyer’s payment for goods or services shall not constitute a waiver by it of any warranty. None of the remedies available to Buyer for breach of any of the forgoing warranties may be limited except to the extent and in the manner agreed upon by Buyer in a separate written agreement specifically designating such limitation and signed by an authorized representative of Buyer.

11. Cancellation, Termination for Convenience: Buyer reserves the right to cancel this purchase order, or any part thereof, at any time, even though Seller is not in default hereunder, by giving written notice to the Seller in the event of such cancellation. Buyer shall pay for all goods and services delivered and completed and an equitable settlement shall be arrived at for the costs incurred by Seller for goods and materials in process not to exceed thirty (30) days average procurement by the Buyer over the previous ninety (90) days prior to notification. Where cancellation is by reason of termination of a contract of the United States Government under which this purchase order has been placed, Buyer will pay the Seller at such time as Buyer is paid by

the United States Government. Upon receipt of any notice of cancellation hereunder, Seller, unless otherwise directed, will immediately discontinue all work in process and immediately cancel all orders or subcontracts given or made pursuant to this purchase order. Exercise by Buyer of the rights of cancellation reserved in this paragraph shall give rise to no liability on the part of the Buyer except as specified in this paragraph and shall not have the effect of waiving damages the Buyer might otherwise be entitled to.

12. Patent, Trademark, Copyright Indemnity: Seller agrees to indemnify Buyer and its successors, assigns and customers and hold them harmless from and against all claims, liability, loss, damage or expense, including attorney’s fees and expenses, arising from or by reason of any suit, claim or demand relating to trademark, patent or copyright infringement or litigation based hereon with respect to the Goods and/or Services, or any part thereof, covered by this order and such obligations shall survive acceptance of the Goods and/or Services and payment thereof by the Buyer. Seller agrees that it will assume the defense of the Buyer and/or its successors, assigns and customers and users of its products against any such aforementioned suit, claim, or demand, pendency of any such suit, claim or demand; provided that it is given reasonable notice of the pendency of any such suit, claim, or demand.

13. Indemnity: Seller will indemnify, defend and hold harmless Buyer, its affiliates, successors and assigns, and its and their respective officers, directors, employees, independent contractors, agents, successors and assigns (collectively, the “Indemnified Parties”), from and against any and all liabilities, losses, costs, expenses, claims and proceedings which any of the Indemnified Parties may suffer or for which any of the Indemnified Parties may become liable and which arise out of any of the following: Seller’s breach of any provision herein or any other agreement between Buyer and Seller; the manufacture or delivery of Goods or any defect in the Goods an/or Services, workmanship or otherwise; any act or omission of the Seller; any actual or alleged infringements of any intellectual property right of any other party, resulting from any sale, use or manufacture of any Goods delivered hereunder; Seller’s failure to comply with any federal, state, county or local laws, ordinance, regulations and codes; and any and all actions, suits, proceedings, demands, assessments, judgments, costs and expenses, including reasonable attorneys’ and consultants’ fees incident to any of the foregoing. If there is a claim against Buyer arising out of the foregoing, Seller will have the right, at its option and expense, to defend any such proceeding, claim or demand. If Seller defends such claim, Buyer shall still have the right, at its cost and expense, to participate in the defense with counsel of its own choosing. Buyer may retain counsel and conduct the defense of the proceeding, claim or demand in question as it may deem proper in its sole discretion, at the sole cost and expense of Seller. Seller may not settle any such proceeding, claim or demand without Buyer’s consent, which shall not be unreasonably withheld.

14. Subcontract, Assignment: Seller shall not, without the prior written consent of Buyer, make any contract with any other legal entity for furnishing any of the completed or substantially completed Goods and/or Services covered by this order or assign this order or any right hereunder.

15. Buyer’s Property: All tools, dies, jigs, patterns, equipment or material and other items purchased, furnished, charged to or paid for by Buyer and any replacement thereof, shall remain the property of Buyer. Such property shall be plainly marked to show it is the property of Buyer and shall be safely stored and maintained apart from other property held by Seller. Seller shall not substitute the property for Buyer’s property and shall not use such property except in filling Buyer’s orders. Seller shall hold such property at its own risk and upon Buyer’s written request deliver the property to Buyer in the same condition as originally received by Seller, reasonable wear and tear excepted. Title to and right of possession to special tooling, dies, jigs, patterns and equipment, the cost of which is fully or substantially amortized in the price of the Goods purchased, shall remain with Seller but Seller shall, at no additional cost to Buyer, hold such special tooling for Buyer’s exclusive use and Seller shall not dispose of such tooling without prior written approval of Buyer. Seller shall take all necessary measures to preserve Buyer’s title to Buyer’s property, free of all encumbrances. Buyer retains the right in addition to other rights provided by law, to enter Seller’s premises and remove Buyer-owned property with or without a court order. Seller shall assume and shall indemnify Buyer against any and all liability for damages to property or injury to, or death of any persons which may arise from, may be incidental to the presence of, or may involve the use of Buyer-owned property whether such damage, injury or death is caused by defects in the property, negligence in the use thereof or otherwise.

16. Drawings, Specifications and Technical Information: The ideas, information and designs contained in or shown upon, and the drawings, specifications, photographs and other engineering and manufacturing information supplied by Buyer shall remain Buyer’s property, shall be retained in confidence by Seller and not be disclosed to any other person or entity, and shall not be used nor incorporated into any product or item later manufactured or assembled by Seller for anyone other than Buyer. Any unpatented knowledge or information concerning Seller’s processes, present or contemplated products or their uses, which Seller may disclosed to employees of Buyer in connection with the ordering, acquisition and use by Buyer of the goods or services covered by this order shall, unless otherwise specifically agreed in writing, be deemed to have been disclosed as part of the consideration for this order and Seller agrees not to assert any claim against Buyer by reason of any alleged use to which any such information or knowledge may be put by Buyer.

17. Chemical Substances: Not withstanding anything to the contrary hereafter represented by either party to the other, Seller warrants that each and every chemical substance sold or otherwise transferred by Seller to Buyer as of the time of such sale or transfer that is required or permitted to be reported for the inventory of chemical substances (409 CFR Part 710) has been reported to EPA either by Seller or by others for incorporation in the inventory of chemical substances compiled and published by the administrator of the Environmental Protection Agency pursuant to the Federal Toxic substances Control Act (PL 94-469).

18. Hazardous Materials: Seller shall notify Buyer of any inherent hazard related to any materials which could be exposed during handling, transportation, storage, use, resale, disposal or scrap. Said notice shall be sent to the Buyer’s Director of Supply Chain Management and shall specify the product name and part number, the nature of the hazard, proper precautions that must be undertaken by Buyer or others to protect against the hazard, and any additional information necessary to protect its interest.

19. Compliance with Law: Seller represents and warrants that the performance of this order in furnishing of goods and/or service called for shall be in accordance with the applicable standards, provisions and stipulations of all pertinent federal, state, or local laws, rules, regulations, executive orders or other ordinances, including but not limited to the Fair Labor Standards Act, as amended and of regulations and orders of the United States Department of Labor issued under Section XIV thereof, the Occupational Safety and Health Act of 1970, and the Toxic Substances Control Act, each as amended and in connection therein. Seller shall include the following legend on all invoices: “We hereby certify that the goods were produced in compliance with all applicable requirements of the Fair Labor Act, as amended, and of regulations and orders of the United States Department of Labor and that the goods as installed and/or used by Buyer will comply with the Occupational Safety and Health Act of 1970 as amended and the implementing rules and regulations promulgated by the Secretary of Labor”.

If Seller is providing goods to Buyer, Seller agrees to review and comply with Buyer’s conflict minerals policy statement (available at the url: <http://phx.corporate-ir.net/phoenix.zhtml?c=131738&p=irol-conflictMineral>) and to use commercially reasonable efforts to: (a) identify whether such goods contain tantalum, tin, tungsten or gold; (b) conduct a reasonable country of origin inquiry regarding the origin of such minerals in such goods to determine whether such minerals originated in covered countries, as defined in Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act; (c) if such minerals originated in covered countries, conduct due diligence on the chain of custody of the source of such minerals for the purpose of identifying the smelter of said materials; and (d) assist Buyer in conducting reasonable due diligence concerning the smelters of such minerals. Seller shall include the substance of this Section in any agreement between Seller and its lower tier sellers and provide Buyer with reasonable documentation of Seller’s and its lower tier sellers’ due diligence efforts, in a format prescribed by Buyer, when requested by Buyer.

20. Equal Opportunity: During the performance of this order, the Seller shall comply with provisions of Executive Order 11246, including all amendments thereto relative to Equal Employment Opportunity and the implementing rules and regulations of the Department of Labor on Equal Opportunity Employment, all of which are incorporated herein by specific references and Seller shall on Buyer’s request, so certify.

21. Gratuities: Seller represents and warrants to Buyer that Seller has not offered or given any employee, agent, or representative of Buyer, or any government, any gratuity with the intent of securing any business from Buyer or favorable treatment under any agreement with Buyer. Any breach of this warranty shall be a material breach of the terms and conditions of each and every purchase order between Buyer and Seller.

22. Waiver: Failure of Buyer to insist on performance of any of these terms and conditions shall not be construed as a waiver of such items, conditions or requirements and shall not affect the right of Buyer thereafter to enforce each and every term, condition or requirement hereof.

23. Severability: If any language herein shall be invalidated for any reason, that language shall be considered deleted and the remainder shall be unaffected and shall continue in full force and effect to the fullest extent permitted by law.

24. Survival: The parties acknowledge and agree that the Terms and Conditions are intended to govern the rights, duties and obligations of the parties following the closing. Accordingly, this Agreement shall survive and shall not be deemed merged into, the execution or delivery of any Good and/or Service.

25. Cumulative Remedies: Nothing herein shall limit Buyer’s rights in law or equity for damages resulting from the delivery of any Goods and/or Services. The remedies provided herein are cumulative and are in addition to any other remedies provided at law, or in equity, and nothing herein shall be construed as prohibiting Buyer from pursuing any other remedies at law or in equity available to it for any breach or threatened breach of these Terms and Conditions, all of such remedies being cumulative in every respect. No waiver of any breach or violation hereof shall be implied from forbearance or failure by Buyer to take action thereon.

26. Choice of Law and Personal Jurisdiction: This contract is made in the County of Harrison and shall be governed and construed in accordance with the laws of the State of Texas. Any action relating to this contract shall be instituted and prosecuted in the courts of the County of Harrison, State of Texas or the United States District Court for the Eastern District of Texas. Seller agrees to submit to the exclusive jurisdiction of such courts and further agrees not to contest such venue as a forum non conveniens. Pending any decision, appeal or judgment in such proceedings or the settlement of any dispute arising under this order, Seller shall proceed diligently with the performance of the order in accordance with decision of the Buyer.

27. Miscellaneous:

- A. The relationship of Buyer and Seller is that of independent contractors.
- B. Unless authorized by Buyer in writing, the names of Buyer, its parent, subsidiaries and/or affiliated corporations or any of their trademarks shall not be used by Seller.
- C. No news release, public announcement, denial or confirmation of same or any part of the subject matter of this purchase order or any phase of this purchase order shall be made without the prior written approval of Buyer.
