Patented Technology
QWIKTIE’s versatile range of adjustment makes it a flexible stock addition. QWIKTIE tie rod assemblies are highly adjustable to fit over 80% of the straight tie rod lengths and styles in the market. QWIKTIE features easy color attributes for identification and accurate installation.

Increased Versatility
With a versatile tie rod solution, QWIKTIE tie rod assemblies reduce overhead for maximum efficiency. QWIKTIE fits from 57 3/8” to 73 7/8” total length from grease zerk to zerk.

Increased Strength
Increased strength and a more even clamping force holds the alignment longer, reducing stress on other suspension components providing increased fuel and tire mileage.

Greater Accuracy
Finer threads provide a more precise adjustment, reducing stress on other steering components. Threads are pre-lubricated for ease of installation and easy adjustment over time.

Safe and Secure
Alignment settings are easily adjusted in a timely manner to achieve a safe, secure connection between the tie rod and threaded tie rod end.

Patented design increases simplicity and safety. STEMCO® QWIKTIE® tie rod assembly offers a highly adaptable solution that can accommodate a wide range of straight tie rod lengths.
VERSATILE. EFFICIENT. SAFE.

The QWIKTIE tie rod assembly offers a highly adaptable solution that can accommodate a wide range of tie rod lengths. Increased clamping and tube strength allows it to hold alignment, reducing stress on other suspension components.

Increased range adjusts to fit over 80% of tie rod assembly lengths in the market (57 3/8” to 73 7/8”).

This table captures example cross references to a QWIKTIE tie rod assembly. For any given axle or tie rod end, there can be many possible combinations of cross-tube lengths. For example, there could be as many as 40 different assemblies using the ES423L tie rod end. For a complete list of cross-tube lengths, visit STEMCO.com.
