

CUT THE BUSYWORK WITH BLUETOOTH®

The DataTrac® SVT Electronic Mileage Sensor helps you put an end to manual busywork by syncing accurate mileage data to the cloud via the STEMCO Fleet Manager App. It also simplifies maintenance procedures and curtails unnecessary maintenance expenses with the ability to schedule maintenance by mileage rather than time.

TAILORED TO YOUR NEEDS

The DataTrac SVT is available in two versions. Choose Tamperproof (607-8005) for capturing odometer readings for billing purposes or Lifetime Reprogrammable (607-8004) for distance-based maintenance management.

UNDENIABLY ACCURATE

Whether for fleet maintenance purposes or logging miles — accuracy is critical. The DataTrac SVT wirelessly provides vehicle odometer readings within +/-2% rotational accuracy, which is more accurate than most competing GPS solutions.

PROVIDES NEEDED FLEXIBILITY

The DataTrac SVT is programmable to count Revs/km or Revs/mile and fits virtually all tire sizes. You can also program it for preset mileage to retrofit existing fleet vehicles.

FOOL-PROOF AND TAMPER-PROOF

We've emphasized simplicity with a small, lightweight design and an easy-to-read, right-side-up 7-digit display. It's also tamper-proof with programming locking after approximately eight miles*.

*DataTrac SVT Reprogrammable is locked to a fleet's ID, but is still reprogrammable by that fleet throughout its life.

**DataTrac SVT leak tested to ensure the enclosure is fully sealed.

BUILT FOR THE LONG HAUL

With no moving parts or lubricants needed and built-in durability and waterproofing,** this corrosion-resistant device is as reliable as they come. It also has a 10+ year battery life with no charging or battery replacement maintenance needed and a 4-year/500k mile warranty for added peace of mind.

SOLUTION COMPATIBLE

The DataTrac SVT easily imports readings to fleet management software and is compatible with our other SVT solutions and our Fleet Manager App. It's also part of our mobile phone compatible platform which brings advanced capabilities to our mileage collection solution.

Get more powerful capabilities with our new platform

STEMCO is taking mileage collection to a new level with our wireless, mobile phone compatible platform for data management. You can maximize the benefits of our DataTrac SVT by using it in conjunction with either of STEMCO's cloud synchronization platforms.

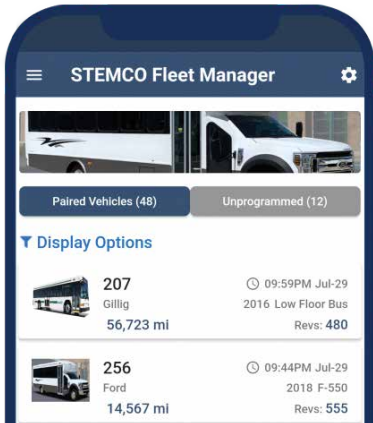

The Sync Server Solution is designed for a smaller fleet operating out of a single terminal. It uses the Fleet Manager App on your Android or Apple iPhone to collect mileage data and keep it synchronized between multiple devices. Data can be exported to .CSV via email.

The Web Portal Solution is designed for medium and larger fleets that need premium features such as gate readers, mileage history, 3rd party interfaces, and support for multiple terminals.

Check the table below to better understand the difference between the configurations and to make the right choice for your business.

FEATURE	SYNC SERVER SOLUTION	WEB PORTAL SOLUTION
Mobile App Compatible	•	•
Multi-User Data Syncing	•	•
User Permission Tri-Level Controls (Admin, Power, Base)	•	•
Software Fees	Free	Trial period followed by paid subscription
Security Model	Basic	Enhanced
User Management Model	Basic, mobile app based	Full, User Management Model on the Web Portal
Multi-Terminal Support		•
Gate Reader Compatible		•
Historical Record Retention	*	5 years
Web Portal Interface		•
Business Solution API Integration Available		•
Fuel and Fluids Logging		•

*Customer can save real-time snapshots of information to a .csv file sent via email.

Keep your team on top of their game with our Fleet Manager App

Now your team can access the information they need quickly from their mobile phones with STEMCO's Fleet Manager App. Easily downloadable and available for multiple users, it's a convenient way for you to keep personnel informed of new opportunities for improving fleet operations.

- Automatically synchronizes to the STEMCO WebPortal OR the Sync Server
- Multi-language support for English, French, Spanish and Portuguese
- Compatible with iOS and Android
